1. What are the strengths of this course?

- * Very interesting subject and Professor Gips made the course very engaging. I especially enjoyed the excel portion.
- * It was a fun course that incorporated both quantitative applications such as excel and more qualitative applications through readings and studies of different companies.
- * Concise and clear teaching. In the management portion, I liked being introduced to new companies and new strategies.
- * I found both sections of the class to be very interesting. The class environment was very casual and had a nice balance between lecturing and student participation. Although the homework for the excel portion of the course was reasonably challenging, the problems helped prepare you for the midterm on excel.
- * Great readings. Very clear.
- * Very informative
- * learned a lot and helped strengthen my Excel skills
- * learn how to use excel, and about disruptive technology and its impact on the world and the future.
- * very good course. You learn a lot in the excel portion and it will definitely be useful later in life, and the information technology section was very interesting.
- * The Excel portion is very helpful and the information systems part is very interesting as well.
- * The case studies were well chosen. The Excel portion was also well done and simple.
- * good case studies pizza fridays good explanations
- * Very interesting to learn technology's effect on the world
- * The excel portion
- * Very interesting. Good material for IS and helpful tips for excel that were important to learn early.
- * The professor, the benefits of mastering Excel, the relevance of the information on technology
- * Prof. Gips is a very intelligent man who does a great job of teaching the subject matter to his students. Despite not being the most exciting subject, this class was always very entertaining because of Prof. Gips.
- * the teacher is passionate
- * Gave plenty of time to do the classwork. I never felt rushed or overloaded with work
- * The information learned in this course, especially the Excel unit will be very useful in the future. It also helped me learn some basic business and information technology terms and concepts, which will be helpful later on.

*** I learned a lot about Microsoft Excel during the early part of this course, and have even found ways to fit Excel programs into my life after taking this course. All the homework assignments are handed in online, and you are given more than enough time to complete each assignment. This allows you to better manage your time and get the homework done when you had time.**

*** I really enjoyed this course. I found the excel course to be extremely interesting and mentally challenging at the same time. The second half of the course was a little less interesting but overall it was a great course. Professor Gips is really approachable and very nice. The Ta's were also great.**

*** It was straightforward but still challenging.**

2. How could the instructor improve the course?

*** The reading for the IS half was heavy and the final in short answer form was extremely long.**

*** I think Professor Gips did a great job with the course, so I can't really think of any ways he could improve it.**

*** Maybe he can be more clear about which articles to read for each class. Sometimes there is confusion and I read the wrong articles!**

*** Can't think of anything.**

*** more interactive**

*** be more engaging**

*** more tests (instead of just a final and a midterm)**

*** Professor Gips does an excellent job of teaching the material and making it interesting.**

*** I can't really think of anything.**

*** We studied the cases in detail, but I sometimes wasn't too sure what I was supposed to get out of the case study.**

*** - more explanation of excel**

*** no suggestions**

*** I do not believe the information system's section deserves such a time commitment, it seems to me like it could be covered in several classes.**

*** I am not sure. It was very well structured**

*** By encouraging more class participation in the second module**

*** Some of the readings in the course booklet seemed to be excessively long.**

*** information systems section got a bit mundane**

*** I think it would have been helpful to do a few more practice problems during class during the Excel unit because there were times that the homework was extremely challenging and time consuming.**

*** The second half of the semester was a little bland, as we weren't using the computer anymore. However, the material was still interesting and easy to understand.**

*** --**

*** none**

3. Would you recommend this course to other students, majors etc.? Why or why not?

*** Yes, because Professor Gips is an excellent professor and the course had interesting content without being too overwhelming of a time commitment.**

*** Yes, I definitely would. I think it's definitely important to learn the fundamentals of Excel because those applications will definitely help in future careers and even future classes.**

*** Yes. I learned so much about excel, and I know it's a useful skill to have. Additionally, this class is extremely interesting.**

*** I would absolutely recommend this course to other students. The material covered in the class is really interesting and the teacher is great.**

*** yes**

*** yes because it gives you an introduction to information systems and also, gips is a great professor**

*** yes**

*** Yes, absolutely. You learn a ton of useful things about Excel, and the case studies on businesses in the information technology section are really cool.**

*** I would because I think it will be very helpful in the business world and I also found it pretty interesting.**

*** I would recommend this course because it includes basic Excel skills necessary to all, and the case studies provide good things to think about.**

*** Yes Gips is a great professor**

*** Yes! It is important to learn about technology in a world that is dominated by it**

*** Not particularly. If i did recommend it it would be for the excel portion. I enjoyed learning how to use the program better.**

*** Yes, interesting and helpful for the future**

*** Absolutely, because the content is valuable to all business students**

*** Yes, I definetly would because Prof. Gips is the best teacher that I have ever encountered.**

*** yes, it's a great class**

*** Yes, as I said it was very useful and it sparked my interest in IT. I am considering pursuing it in some way in the future.**

*** Yes, Professor Gips is an extremely knowledgeable teacher and a great guy. Overall, I learned a lot in this course that will help me in the future. I am even considering an additional concentration in Information Systems following this course.**

*** Yes, it was a great course and Professor Gips is great.**

*** Yes, Gips is the best**

4. Additional comments:

*** One of the best classes I've ever taken. Definitely in my top 3.**

*** none**

*** The exam was pretty hard...I don't remember seeing some of the terms such as "competing in time"...maybe I didn't pay close enough attention?**

*** None**

*** Thank you Professor Gips for a great semester!**

*** The midterm was rather challenging, especially for the amount of time that we were given to complete it. I put a lot of time into studying and simply I made silly mistakes simply because I did not have ample time to complete the problems.**
